Course description

Qualification Bachelor

Field of study Agriculture and environment

Course summary An English-language degree programme in agri-food chain management directed towards a management career in one of the following profiles: Food supply chain manager; Logistics manager; Product manager

Course description Food value chains are important because food production is becoming increasingly complicated. In the past, we consumed mainly local food products: the lines were short; we knew how and where the food was produced and we sometimes collected it directly from the farmer himself. Today, food is available through large supermarket chains which import food products from all over the world. In short, the entire chain has become long and complicated. Food chain management involves managing these complicated processes in which logistics, efficient operational management, cooperation and trust are key words

Study subjects • Purchasing and Procurement • Distribution management • Supply Chains • Reverse Logistics • Logistics • Sustainability • EU food legislation • International food trade • International management • Intercultural management • Marketing • Sales skills • Research skills • Basics of the European Union • Value chain management • Business analysis • Financial analysis • HR management

Course objectives To provide students with a knowledge of the food chain in an international business environment. Students will learn how the agribusiness company is managed in daily practice, how decisions are taken and how added value can be created through cooperation in the food value chain.

ECTS credits 60.00
 Duration 11 month(s)
 full-time
 Language of instruction English
 Instruction modes case study, excursion, individual assignment, lecture, research proposal, self study, traineeship, workshop

About the institution

Department -

Talent for growth. That is what Aeres University of Applied Sciences (Aeres UAS) from the Netherlands stands for. Our university is rooted in the agricultural and educational higher education. We focus on education, research and sharing knowledge. This is how we contribute to the development of innovative professionals. Professionals who are capable of taking

Information about the institution responsible decisions in a complex world, with a natural talent for acting sustainable. Aeres University of Applied Sciences offers Bachelor programmes, a Master programme and a number of short courses. We have three faculties in the cities: Dronten, Almere and Wageningen. We share the same vision and mission, but we each have our own profile and identity. Aeres UAS is part of the Aeres group, which also contains TVET colleges in Agriculture and Aeres Training Centre International (ATCI) in Barneveld. The short courses of Aeres UAS are offered in close cooperation with ATCI and result into a certificate or diploma.
