Course description

Qualification	Master of Science
Field of study	General programmes
Course summary	MSc Digital Design seeks to educate professionals who create, adapt and apply design processes into interactive digital products, while driven by an ethical perspective on people, profit and planet.
Course description	The Master of Science programme in Digital Design is a full-time, one-year curriculum and centres on four main areas of expertise: Literacy, Research, Creation and Strategy. It also involves three projects, as well as a closing exhibition. In addition, the programme often invites established names of the design world for lectures and workshops and organises after-school events such as meetups. Courses, projects and events partially overlap during the academic year, enabling students to establish their own connections between topics and to apply their competences in a studio setting. Each area of expertise is linked to a track, attendance to all of which is compulsory.
Study subjects	-
Course objectives	-
ECTS credits	60.00
Duration	12 month(s) full-time
