Course description

Qualification Certificate

Field of study Health care, social services and care services

Course summary Complex emergencies, assessment of disrupted health systems, health systems components, governance, humanitarian aid and politics, human rights, policies, strategies and plans, recovery process

Course description Protracted crises, mainly those labeled complex emergencies, have a severe impact on health systems, including policy development, human resources, financing, management, and support systems. Unreliable, incomplete information hampers sound decision making, and fast evolving conditions increase uncertainty. They suffer from damage at all levels and from the limited legitimacy and capacity of national authorities, yet there are unique opportunities for addressing their main weaknesses and disruptions during the recovery period. Using participatory learning approaches, this course focuses on analyzing the major features and distortions of disrupted health systems, explores the concept of complex emergencies, and discusses challenges in obtaining and using data and information in these contexts. It takes a critical look at humanitarian aid and its politics as well as the recovery and rebuilding of the health system, including governance, financing, and pharmaceutical supply. Case studies explore successes and failures in rebuilding health sectors of conflict-affected countries, analyse key actors' agendas and the health sector strategies, plans and monitoring and evaluation approaches

Study subjects	Complex emergencies: trends, impact and challenges, Conflicts, health status and health systems, Humanitarian aid and its politics, Data and information challenges in crises, Health services delivery in crises. International Humanitarian Law, human rights, conflict and health, Policies, strategies and plans, Main components of health system in crisis, Recovery processes, Case studies
Course objectives	Use adequate tools for health system analysis in crises and adapt them, whenever it is relevant, to the local context; Assess a disrupted health system's structure and features; Identify their adaptation during crises and formulate measures to develop effective strategies and plans; appreciate key health sector actors agendas and how to influence them; Present findings of health systems analysis
ECTS credits	4.00
Duration	10 day(s) full-time
Language of instruction	English
Instruction modes	case study, group assignment, group discussion, lecture, literature study, oral presentation, self study, tutorial, working group
Accreditation	-

About the institution

Department Royal Tropical Institute (KIT) MIH, CROHO code 70048

Information about the institution
 KIT is a not-for-profit knowledge and expertise organisation for international and intercultural cooperation. Through master programmes, short courses and institutional support, KIT equips health professionals to be leaders in addressing public health challenges around the world. KIT has offered training programs on international public health since 1963. Currently this includes two International Masters Programs and a wide range of short courses and online courses. The courses respond to current global developments in the health field. KIT's courses are known for their practical applicability, the multidisciplinary approach and the interactive, participatory training methods. Courses at KIT are followed by health professionals from all over the world. KIT's Masters courses are given in cooperation with the Vrije Universiteit Amsterdam (VU) and are accredited the Dutch Flemish Accreditation Organisation (NVAO). In addition advanced courses are all accredited by TropEd, an international network of institutions for higher education in international health.

full-time

Application deadlines	Start date	EU/EEA Students	Non-EU/EEA students
	17 Aug 2020	17 Jun 2020	17 Jun 2020
	16 Aug 2021	16 Jun 2021	16 Jun 2021

Year	EU/EEA	Non-EU/EEA	Institutional
2020 (FT)	€ 2000	n.a.	n.a.

In short, the following rules apply:

- Tuition fees
- The "EU/EEA rate" is the regular fee for students from within the EU/EEA.
 - The "non-EU/EEA rate" is the rate for students from outside the EU/EEA.
 - The "institutional rate" is for all students who have already obtained a bachelor's or master's degree and who want to start a second programme leading to a degree at the same level or at a lower level.
 - Note that FT, PT and D stand for "full-time", "part-time" and "dual", respectively.

Make sure you contact your institution to find out what rate applies to you. The rates listed here are estimates.
