Course description

Qualification Master of Science

Field of study Health care, social services and care services

Course summary The international Master's programme Vitality and Ageing looks in-depth at the ever growing ageing population. A challenge in many countries and a diverse, upcoming field that needs young academics.

Course description Would you like to play a role in the health management of an ageing population? Increasing your knowledge of the biological, individual and public health, and healthcare management aspects of vitality and ageing. This one-year programme will form the ideal preparation to play a key role in improving the future of our ageing society! There's more to growing old gracefully than staying as healthy as you can for as long as you can. For example, maintaining independence and continued participation in social activities are equally as important. As a student you will be working in a fast-paced interdisciplinary environment alongside top international experts as well as, students from various bachelor's and nationalities and older adults. Our internationally oriented master's programme will equip you with scientific insights on ageing, extensive training in transferable academic skills and career orientation! The programme is offered by Leiden University Medical Center (LUMC) and Leiden University. The LUMC is a modern academic hospital in which research, education and patient care are combined with a high quality profile and a strong scientific orientation. Since years, the LUMC has a

Study For an overview of the subjects offered by this programme in the current year, check out the e-Prospectus: <https://studiegids.leidenuniv.nl/en/studies/show/vitality-and-ageing>. The

subjects	subjects can vary from year to year.
Course objectives	The master's aims to prepare our students for a career in the diverse and complex challenges of the growing ageing population. Therefore our programme incorporates an international, intergenerational and interdisciplinary focus in each of the courses. The academic year consists of 5 courses and 3 educational lines with a combination of interactive lectures, discussion groups, self-study assignments, personal development, tutor group sessions and is finalised with a master thesis.
