Course description

Qualification Master of Science

Field of study Economics, commerce, management and accounting

Course summary In this master's programme you will get a better understanding of ICT in the Public Sector and its impact on governance.

Course description Challenges concerning the use of ICT in the public sector are huge. These challenges are related to efficiency and effectiveness, but can also strengthen the democratic functions. You will study issues relevant in the public domain such as politico-administrative relations, European procurement a data-driven policy development. You will learn how to benefit from your Computer Science knowledge by applying this knowledge on an administrative, managerial level. Are you interested in understanding the many functions and roles IT have and how they should be governed? Do you have a bachelor's degree in computer science (or equivalent) and would you like to apply that knowledge in a governmental environment? Then ICT in the Public Sector is the right choice for you. Besides understanding issues relevant in the public domain, this master's programme covers the interface between IT and management in the Public Sector. In several courses, we cooperate with our faculty of Governance and Global affairs in The Hague.

In short, the following rules apply:

- Tuition fees
- The "EU/EEA rate" is the regular fee for students from within the EU/EEA.
 - The "non-EU/EEA rate" is the rate for students from outside the EU/EEA.
 - The "institutional rate" is for all students who have already obtained a bachelor's or master's degree and who want to start a second programme leading to a degree at the same level or at a lower level.
 - Note that FT, PT and D stand for "full-time", "part-time" and "dual", respectively.

Make sure you contact your institution to find out what rate applies to you. The rates listed here are estimates.
