Logistics Engineering

Breda University of Applied Sciences

Bachelor Undergraduate Breda

[Send by email](#) [Save page as PDF](#)

Course description

Qualification Bachelor of Science

Field of study Hotel, catering, tourism, leisure, transport and logistics

Course summary BUas offers two international programmes in the field of logistics. This English-taught professional bachelor's programme prepares you for a career in the international logistics industry.

Course description In the management programme the emphasis is on financial aspects and marketing, whereas the engineering programme deals with the technical aspects of storage and transport. After your graduation at BUas, you are the logistic expert who offers optimal customer service at minimal cost to any logistics-related business challenge! Graduates are equipped to fill positions such as purchase, logistics, supply chain or project manager at national and international transport companies, wholesale companies, retailers, manufacturers, ICT companies and consultancy firms. Please be aware of the fact that many graduates start at the bottom of the career ladder - in assistant positions - and work their way up to management positions. BUas also offers the International Logistics Management programme, during which you learn to approach logistic issues with a stronger emphasis on management.
