Course description

Qualification Bachelor of Science

Field of study Humanities, social sciences, communication and arts

Course summary Are you interested in the world around you? Are you fascinated by maps? Do you dare to ask critical questions about the world that you are living in?

Do you believe you can help to further develop our world into a sustainable society? Then Human Geography & Urban and Regional Planning (in Dutch: Sociale Geografie en Planologie) may be the right choice for you. Why is unemployment higher in some regions than others? What are the social and economic consequences of depopulating areas? How do you deal with different institutions to plan and build new residential areas? You will learn to investigate society in a spatial context and focus on spatial differences because social phenomena happen in specific places, at specific times and have specific impacts. You can use this knowledge to create and develop new ideas to improve the current and future societal landscape, within a broad scope of topics (e.g. labour markets, global development, migration, governance, cultural heritage). In the first year you will be introduced to all themes within the fields of Human Geography & Planning. In the second year, the programme continues to deepen your knowledge and improve your skills. In the third year you are allowed to partly fill in your own programme. You can follow courses provided by our faculty but you can also take a Minor or do an int
