### Course description

Qualification Master of Science

Field of study Economics, commerce, management and accounting

Course summary English-language programme where statistics, mathematics & computer science are used to gain deeper understanding of business & economic problems. There are four specialisations available

Course description Do you want to forecast economic developments, or create IT solutions to solve production issues? The Econometrics and Operations Research programme allows you to apply mathematical and statistical skills in a business context. It also enables you to solve problems in fields like logistic planning, information management and telecoms - often using IT solutions. This one-year programme, taught in English, is great preparation for a career in a variety of financial institutions including banks, insurance companies and pension funds - as well as other public or private companies in logistics, telecoms or production, for example. The programme allows you to choose one of four specialisations: 1. Actuarial Sciences 2. Econometrics 3. Mathematical Economics 4. Operations Research

1 Sep 2020	1 Jun 2020	1 May 2020

Year	EU/EEA	Non-EU/EEA	Institutional
2019 (FT)	€ 2060	€ 13800	€ 13800

In short, the following rules apply:

Tuition fees

- The "EU/EEA rate" is the regular fee for students from within the EU/EEA.
- The "non-EU/EEA rate" is the rate for students from outside the EU/EEA.
- The "institutional rate" is for all students who have already obtained a bachelor's or master's degree and who want to start a second programme leading to a degree at the same level or at a lower level.

- Note that FT, PT and D stand for "full-time", "part-time" and "dual", respectively.

Make sure you contact your institution to find out what rate applies to you. The rates listed here are estimates.
