Course description

Qualification Master of Science

Field of study Humanities, social sciences, communication and arts

Course summary Prepares students for a career in biological or cognitive psychology with a focus on research skills. English-language programme has six specialisations within two fields.

Psychology is a challenging master's programme that prepares students for a professional career in one of the emerging fields of biological and cognitive psychology. The programme is research-driven and offers six specialisations : * Developmental Psychology * Cognitive Neuroscience * Neuropsychology * Health and Social Psychology * Psychology and Law * Work and Organisational Psychology. Each specialisation starts with four theoretical courses combined with academic, research and professional skills trainings. The second part of the year is devoted to planning and carrying out a research internship under the supervision of the academic staff. A substantial number of students do this internship abroad with one of our many international research partners. You complete the master's programme by writing a master's thesis on your research internship.

Study subjects -

The master's programme in Psychology offers six specialisations within Cognitive and Biological Psychology. You have to choose one of these six specialisations. Each specialisation starts with four theoretical courses combined with training in academic,

Course objectives

research and professional skills. The second part of the year is devoted to planning and carrying out a research internship. You will complete the programme by writing a master's thesis on your research internship.
