Course description

Qualification Bachelor of Science

Field of study Humanities, social sciences, communication and arts

Course summary This 3-year English-taught Bachelor's will equip you as an 'intervention engineer' skilled in combining in-depth psychological insight and technological expertise with 21st-century problem solving.

Course description The three-year English-taught Bachelor's programme Psychology (PSY) will equip you to combine in-depth psychological expertise with hands-on 21st-century problem-solving. You will learn to research and analyse problems and to come up with effective interventions for current challenges in healthcare - for example, in clinical practice - business, education, or the fight against terrorism. You will learn how to deal with the possibilities and risks of new technologies - for example, using human-friendly robots, creating smart remedies for gaming addictions, or reducing traffic risks resulting from mobile phone use. The programme is set in a rich international environment with students and staff members from different backgrounds tackling topics and cases from many countries. Our small scale and informal, personal approach are highly appreciated. As a forward-looking 'intervention engineer', you will be ready to make a difference in a broad variety of societal domains. Your proficiency in working across cultural and disciplinary boundaries and in applying psychology to practical issues will give you above-average career prospects as a researcher, designer or organizer.

Study In the first year of the course, you will study the key scientific principles of psychology in detail. You will directly make use of the knowledge and skills that you have gained in projects. Examples of projects that you will be working on in the first year are: * encouraging

subjects	people with obesity to exercise and play sports; * designing a driving simulator lesson for people with ADHD; * designing an approach to tackle bullying at work or in the classroom; * designing a test to identify
Course objectives	In the psychology Bachelor's, you study human behaviour. Unlike many other psychology programmes in the Netherlands, we focus on both the theory and practice of psychology. At our university, you will learn to analyze psychological problems and to design practical solutions aimed at influencing human behaviour. Check out the study programme here.
