Course description

Qualification None

Field of study General programmes

Course summary Many of the jobs we will be doing in five years do not exist today. The world is changing rapidly and the world of finance has to change with it. New innovations will take place both within and beyond

Course description On this course, you will deal with real-life cases and projects, honing your creativity, flexibility, professional insights and social skills in lean (start-up) projects and scrums that equip you to face the future of today's gig economy. You will learn to innovate within a sustainable financial model or product, cooperating with financial experts in a business environment based on principles such as good finance, inclusive finance and international impact investment. New startups as well as banks, insurance companies, pension funds and other traditional financial institutions will reap the rewards of your expertise on finance's new frontier. At the end of this course, you: * grasp the principles and concepts of doing business in an international market context in various economic cycles * can develop a lean start-up and arrange SME financing during the lifecycle of a firm * can utilize forecasting and scenario techniques to define financing needs and structures * can adopt various approaches to financial models and fintech innovations such as blockchains * are able to work in cross-cultural teams, write a lean plan and present a financing request in a Dragons' Den setting
